## Widespread Avalanching in Divide Drainage

Divide Cirque Northern Gallatin 1/26/2019 Code SS-NCr-R3-D2.5-O Aspect SE Latitude 45.39030

Longitude -110.96900 Notes

A skier in Hyalite reported widespread avalanche activity in the Divide drainage. From the email: "Saw this set of crowns just to the looker's left of Divide Peak proper. Appear to be <u>cornice</u> triggered, I suspect they all released sympathetically, maybe sometime yesterday. Impressively connected, definite PWL issue. SE <u>aspect</u>. Crowns spanned nearly 1/2 mile of terrain." Photo: B. VandenBos
