Remote Triggered at Sunlight Basin (Taylor Fork)

Sunlight Basin Southern Madison 1/27/2019 Code SS-AFr-R2-D2-O Elevation 9500 Aspect SE Aspect Range E-SE Latitude 44.97560 Longitude -111.31300 Notes

We triggered these avalanches remotely, about 50 feet above the crown up on the ridge. Each crown was 1-2' deep, 100' wide, and both slides ran between 200 and 300 vertical feet through trees and cliffs. The slides failed on a 40 cm thick layer of <u>depth hoar</u>, which composed half of the snowpack. Photo: GNFAC
