

Whumpfing and small ava in Cooke City

Date

Mon, 01/01/2024 - 07:15

Activity

Skiing

Still getting collapsing/ whumpfing of the snowpack in isolated areas around Cooke City.

We experienced about 4 good collapses on Monday north of town (with approximate diameters about 25-30').

And noted where a natural [cornice](#) fall had triggered a small [slab](#) avalanche about 30' wide.

Region

Cooke City

Location (from list)

COOKE CITY
