Natural Avalanches and Cracking, Lionhead

Lionhead Ridge Lionhead Range 1/15/2024 Code SS-R1-D1.5-O Latitude 44.71450 Longitude -111.31800 Notes

From Obs: "While riding today on Lionhead we saw several natural releases on steeper terrain Mainly on Targhee Peak. On all aspects of slopes we experienced large cracks and collapses that would extended 75 plus yards ahead of our sled. We did not venture into steeper slopes but it sure felt like they would <u>slide</u> easily if we did!"

Second Ob from FB Messenger: Shooting cracks on many slopes. Watch the video at 10:30 for examples
