

deep slab north side mt blackmore

Date

Mon, 03/11/2024 - 09:15

Activity

Skiing

Cornice fall triggered a big one. Looks to be real fresh. last night or this morning Broke across the whole bowl and up to 8 feet deep maybe more right in the middle Broken trees in the debris, And ran out of sight.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Jake Schack
