

Skier triggered avalanche in Banana couloir

Date

Sun, 04/07/2024 - 16:20

Activity

Skiing

From IG message: “Rode the banana today.. lots of fast moving sluff. Had a mid elevation pocket pop. New snow seemed to have bonded well, the spot that did pop had formed into 12” slab below rock face. Little to no signs of instability.”

Region

Bridger Range

Location (from list)

Ross Peak
