

Snow Pit Profile
Goose Creek
Beartooth, MT
 Elevation (ft) **9567**
 Aspect: **340**
 Specifics:

Observer: **Mark Staples**
Tue Dec 17 12:45:00 MST 2013
 Co-ord: **45.08220 N 109.94079 W**
 Slope: **26**
 Wind loading: **no**

Stability on similar slopes:
 Air Temperature: **C**
 Sky Cover:
 Precipitation:
 Wind: **Calm**

Stability Test Notes:
103: popped out
 Layer note: **103-104: F**

Notes: See pit from 11-27 in this area at: http://www.mtavalanche.com/images/13/goose-creek-pit?size=_original We found surface hoar on Henderson Died. It was at the exact same location. HS there was 165cm and stability test result was ECTP17/13. All other layers in this pit felt solid and it was easy to miss the surface hoar without a stability test.

Advisory Region
 Cooke City
